

EYE CARE

1. Under R100

EyeSlices™, R65.

WHAT IS IT? Disposable pads that slowly feed a blend of active ingredients and moisture to your eye area.

WHY CHOOSE IT? These slices are packed in a travel-friendly compact holder (*pictured*), and you can re-use them up to five times or until they dehydrate. They have a cooling effect and help to relieve tired, puffy, red and irritated eyes.

2. Between R100 and R500

Clarins Advanced Extra-Firming Eye Contour Cream, R390, and Serum, R390.

WHAT IS IT? Together, these products work on problems around the eye. The cream helps fight lines and wrinkles with plant extracts; the serum reduces puffiness and dark circles by boosting circulation and gently tightening the skin with caffeine and hibiscus.

WHY CHOOSE IT? These two products work well together, with light textures to soothe skin and soft-focus pigments to brighten eyes.

3. Over R500

Orlane Pure Youth Eye Contour Concentrate, R735.

WHAT IS IT? ^{1/2} targets the eye contour area affected by the ageing process with bio-stimulants to boost and balance oxygen absorption. Algae extracts improve the skin's resistance to environmental extremes.

WHY CHOOSE IT? When you apply the gel, it feels like a rejuvenating splash of water. ➤
